

AI Engineer for Dataclair AI Centre (m/f)

📍 Praha

🕒 Full-time work

📄 Vhodné i pro absolventy

We are thrilled to announce a new position within our **Dataclair** team.

We're looking for a **skilled hands-on AI Engineer** with a desire to grow into a position in the world of **data science**. If you join our team in this role, you'll have a unique **opportunity to shape our flagship products and be at the forefront of transforming the telco business**.

In this role you'll be **deeply in hands-on delivery** and have an **opportunity to grow** within the team.

You're the **right candidate** if you're a **fast thinker** with the **"work hard, play hard" attitude**, you're a **passionate innovator** and you're good at explaining what you do and why you do it.

Your day-to-day job will include

- Hands-on coding
- Designing of complex ML products and pipelines
- Use primarily Python and libraries for Machine Learning (e.g., TensorFlow, PyTorch, Sklearn etc.) in Azure
- Process big volume of telco data using (py)Spark in Azure
- Cracking challenging problems of how to develop, productionalize and deploy models over messy telco big data
- Collaborate with other engineers, product managers, and other teams within Dataclair to accelerate development and deliver compelling machine learning products within complex telco environments
- Staying up to date with state-of-the-art advances in machine learning

Skillset and qualifications you'll need

- Master's degree or relevant work experience
- 1+ years in the field
- English in full professional proficiency (you will communicate with non-Czech speakers daily)
- Excellent coding skills in a major programming language relevant to the field (Python, R, etc.)
- Excellent skills with one of the major ML/DL packages
- Familiarity with SQL
- Experience with practical data science and hands-on involvement with deployed ML pipelines in a business environment

What to expect

- A mission that goes beyond performance and profit ("AI for good" is our mantra)
- Hybrid working mode
- Seasoned leaders you can count on
- A company culture that helps the team to perform highly and humanly at the same time
- Regular bonus pays based on your KPI
- Employee benefits (scroll down for details)

Good-to-know about Dataclair

In short, we do AI. In full, we do AI to make the world a better place.

We are strong advocates of fair machine learning in a business environment. We implement and deploy our ethical AI algorithms so that they elevate human condition, improve quality of life, and generate significant profits at the same time.

Dataclair has been founded by the biggest Czech telco operator O2 as a centre of AI R&D and business application in telco, finance and pharma. It combines the best of both the corporate and startup worlds – a stable working environment, inspirational colleagues and bold mission.

The company we're a part of: <https://www.o2.cz/spolecnost/>

The place where we stay: <https://www.prague.eu/en>

We can offer you

- You will be in touch with the latest technologies and new trends
- Contribution to a work mobile phone of your choice up to CZK 18,000
- Cafeteria 18,000 points
- Meal allowance CZK 115/work day
- Recharge break - after every 5 years of employment, employees are entitled to an additional 20 days of paid leave
- 25 days of vacation
- 3 sick days
- Unlimited employee tariff
- Discounted O2 TV and home internet
- Discounted language courses
- O2 offers a wide range of other benefits. You can find a list of all benefits at: <https://kariera.o2.cz/benefit>
